Hello Ms. Wiener,

EPA has completed sampling activities for 61 residential drinking water wells. Individual data packages have been provided to the 11 homes that we sampled in the first week and we plan to provide individual data packages with the next grouping of residents as soon as possible.

While we can not release individual private citizen's personal information, such as names and addresses, we have posted publicly available documents related to the Dimock Residential Groundwater Site at www.epaossc.org/dimock_residential_groundwater The website contains the Sampling Plan which details what EPA tested for in the wells. You may also review the Administrative Record File on-line which contains the documents on which EPA based its decision to sample residential wells. That website address is www.epa.gov/arweb.

Sincerely,

Trish Taylor, Community Involvement Coordinator

Subject: Dimock

Dear Ms. Taylor,

I have a few questions about the results of the portion of the Dimock water test results that were released on March 15.

Are the tests of the first 11 samples complete?

Were all possible gas drilling related substances tested for?

Were all possible NORMs tested for?

Where can we obtain a copy of the test results report? If there is public access please point me in the right direction, if the report must be requested by FOIL please let me know.

Thank you,

Jill Wiener
